How to Grow More Vegetables, Ninth Edition John Jeavons 2017-07-25 The world's leading resource on biointensive, sustainable, high-yield organic gardening is thoroughly updated throughout, with new sections on using 12 percent less water and increasing compost power. Long before it was a trend, How to Grow More Vegetables brought backyard ecosystems to life for the home gardener by demonstrating sustainable growing methods for spectacular organic produce on a small but intensive scale. How to Grow More Vegetables has become the go-to reference for food growers at every level, whether home gardeners dedicated to nurturing backyard edibles with minimal water in maximum harmony with nature's cycles, or a small-scale commercial producer interested in optimizing soil fertility and increasing plant productivity. In the ninth edition, author John Jeavons has revised and updated each chapter, including new sections on using less water and increasing compost power.

The Spy Who Would Be Tsar Kevin Coogan 2021-08-16 Michal Goleniewski was one of the Cold War's most important spies but has been overlooked in the vast literature on the intelligence battles between the Western Powers and the Soviet Bloc. Renowned investigative journalist Kevin Coogan reveals Goleniewski's extraordinary story for the first time in this biography. Goleniewski rose to be a senior officer in the Polish intelligence service, a position which gave him access to both Polish and Russian secrets. Disillusioned with the Soviet Bloc, he made contact with the CIA, sending them letters containing significant intelligence. He then decided to defect and fled to America in 1961 via an elaborate escape plan in Berlin. His revelations led to the exposure of several important Soviet spies in the West including the Portland spy ring in the UK, the MI6 traitor George Blake, and a spy high up in the West German intelligence service. Despite these hugely important contributions to the Cold War, Goleniewski would later be abandoned by the CIA after he made the outrageous claim that he was actually Tsarevich Alexei Nikolaevich of Russia – the last remaining member of the Romanov Russian royal family and therefore entitled to the lost treasures of the Tsar. Goleniewski's increasingly fantastical claims led to him becoming embroiled in a bizarre demi-monde of Russian exiles, anti-communist fanatics, right-wing extremists and chivalric orders with deep historical roots in America's racist and antisemitic underground. This fascinating and revelatory biography will be of interest to students and researchers of the Cold War, intelligence history and right-wing extremism as well as general readers with an interest in these intriguing subjects.

Mechanization for Rural Development Josef Kienzle 2013 This publication gives a wide-ranging perspective on the present state of mechanization in the developing world, and, as such, constitutes a solid platform on which to build strategies for

a sustainable future. Farm mechanization forms an integral plank in the implementation of sustainable crop production intensification methodologies and sustainable intensification necessarily means that the protection of natural resources and the production of ecosystem services go hand-in-hand with intensified production practices. This requires specific mechanization measures to allow crops to be established with minimum soil disturbance, to allow the soil to be protected under organic cover for as long as possible, and to establish crop rotations and associations to feed the soil and to exploit crop nutrients from various soil horizons. This work is the starting point to help the reader understand the complexities and requirements of the task ahead.

Farm Tractor Systems Segun R. Bello 2012-11-30 A link between machine functionality, operations, performance and decision making in the management of power sources and field operations were presented in this book. Depreciation and functional deviation of a machine from its original state at manufacture could put the life of a machine in danger of breakdown or obsolescence, which is counted a loss to any such organization or the entrepreneur. To avoid such losses, an understanding of machine systems functionality and a well organized maintenance programme designed to maintain, prevent or restore machine to near original state is required. Vocational training and entrepreneurship education in Nigeria's tertiary institutions has made possible a do-it-yourself skill acquisition in machine fault tracking, maintenance and repairs. A bimodal training programme packaged and presented in this book is all that is required for managerial decision making, maintenance and qualitative service delivery.

Massey Ferguson 100 Series In Detail Michael Thorne 2018-02-06 Following his well-received books in this 'In Detail' series on the Ferguson TE20 and the Massey Ferguson 35 & 65 models, author Michael Thorne turns his attention to the outstandingly successful and well-loved 100 Series of tractors. Of the 100 range, the most popular was and remains the 135. Half a million 135s were built at Massey Ferguson's factory in Coventry alone, with production overseas on top of this figure. Another big success was the larger, more powerful 165, with nearly 200,000 sold. This model, like the 135, is among the most popular and sought-after classic tractors today, although many 135s and 165s are still in active use around the world, in spite of their age. The 100 range included a great number of other models, and in addition to the 135 and 165, which are given in-depth treatment here, important models described in detail are the 130, 148 Super-Spec, 168, 175, 185 and 188 Super-Spec. There is an extensive chapter on the implements available for the range, and another on conversions. Featuring 290 illustrations including detailed specially-commissioned colour photography of outstanding examples of 100 Series tractors, Massey Ferguson 100 Series In Detail offers an unrivaled store of knowledge for the owners and enthusiasts who care passionately about these tractors, and serves as a tribute to the people who made them.
