Charles I 2018 During his reign, King Charles I (1600-1649) assembled one of Europe's most extraordinary art collections. Indeed, by the time of his death, it contained some 2,000 paintings and sculptures. Charles I:

King and Collector explores the origins of the collection, the way it was assembled and what it came to represent. Authoritative essays provide a revealing historical context for the formation of the King's taste. They analyse key areas

of the collection, such as the Italian Renaissance, and how the paintings that Charles collected influenced the contemporary artists he commissioned. Following Charles's execution, his collection was sold. This book, which accompanies the exhibition, reunites its most important works in sumptuous detail. Espresso Coffee David C. Schomer
2004-01-01 When I started a coffee company in April of 1988, my approach to espresso was formed from these two disciplines which can be summed up in a tidy little sound bite: scientific precision guided by artistry. First and always foremost: all information is geared to making an espresso that is characterized by a heavy red-brown syrup called crema. This crema features an intense coffee flavor that is free of bitterness. Ideally, espresso should always taste like the freshly ground coffee smells. Texture is featured always, and should feel like a pair of velvet pajamas wrapped around your tongue. - Introduction.

Basho's Narrow Road Matsuo Basho
2013-06-15 Matsuo Basho (1644-94) is considered Japan's greatest haiku poet. *Narrow Road to the Interior*

(Oku no Hosomichi) is his masterpiece. Ostensibly a chronological account of the poet's five-month journey in 1689 into the deep country north and west of the old capital, Edo, the work is in fact artful and carefully sculpted, rich in literary and Zen allusion and filled with great insights and vital rhythms. In Basho's *Narrow Road: Spring and Autumn Passages*, poet and translator Hiroaki Sato presents the complete work in English and examines the threads of history, geography, philosophy, and literature that are woven into Basho's exposition. He details in particular the extent to which Basho relied on the community of writers with whom he traveled and joined in linked verse (renga) poetry sessions, an example of which, *A Farewell Gift to Sora*, is included in

this volume. In explaining how and why Basho made the literary choices he did, Sato shows how the poet was able to transform his passing observations into words that resonate across time and culture.

'Written by a World Barista Champion and co-founder of the great Square Mile roasters in London, this had a lot to live up to and it certainly does. Highly recommended for anyone into their coffee and interested in finding out more about how it's grown, processed and roasted.'
(Amazon customer) 'Whether you are an industry professional, a home enthusiast or anything in between, I truly believe this is a MUST read.'
(Amazon customer) 'Informative, well-written and well presented. Coffee table and reference book - a winner'
(Amazon customer) 'Very impressive. It's amazing how much territory is covered without overwhelming the reader. The abundant photos and images are absolutely coffee-table-worthy, but this book is so much more. I think it would be enjoyable

for an obsessed coffee geek or someone who just enjoys their java.' (Amazon customer) For everyone who wants to understand more about coffee and its wonderful nuances and possibilities, this is the book to have. Coffee has never been better, or more interesting, than it is today. Coffee producers have access to more varieties and techniques than ever before and we, as consumers, can share in that expertise to make sure the coffee we drink is the best we can find. Where coffee comes from, how it was harvested, the roasting process and the water used to make the brew are just a few of the factors that influence the taste of what we drink. Champion barista and coffee expert James Hoffmann examines these key factors, looking at varieties of coffee, the influence of

terroir, how it is harvested and processed, the roasting methods used, through to the way in which the beans are brewed. Country by country - from Bolivia to Zambia - he then identifies key characteristics and the methods that determine the quality of that country's output. Along the way we learn about everything from the development of the espresso machine, to why strength guides on supermarket coffee are really not good news. This is the first book to chart the coffee production of over 35 countries, encompassing knowledge never previously published outside the coffee industry.

Epidemiology of Malignant Melanoma

Richard P. Gallagher 2012-12-06

Interest in the etiology of malignant melanoma has increased enormously in the last 10 years, after it was realized that the incidence of the cutaneous form of the disease was rising. Treatment of the disease has not improved dramatically, and our best hope for curtailing the rise in mortality and morbidity from the disease appears to be primarily through early detection and, perhaps in the future, through prevention. It is thus very important for the medical community to be able to recognize individuals and groups at high risk of the disease because of either familial and constitutional factors and lifestyle or exposure to

environmental risk factors. This book, arising from a meeting held in Vancouver in 1984, provides a summary of the latest findings among ~ Caucasian populations along with perspectives on the most important environmental risk factors identified to date. Comparison of results from the four major analytic studies presented here also demonstrates that a number of factors implicated in other common cancers are probably not related to the incidence of melanoma. These include smoking, alcohol consumption, and for the most part, diet. The Vancouver conference was sponsored by the Cancer Control Agency of British Columbia, and was financially supported by Health and Welfare Canada (6610-1429-50), the Northern California Cancer Program (NCCP), Miles Laboratories (Canada),

Bristol Myers Laboratories (Canada),
and Plough Canada Inc.
